LOW-RESISTANCE RESISTOR AND ITS MANUFACTURING METHOD

TC/A.U.:

Examiner:

Kyung S. Lee

Confirmation No.: 6704

Docket No.:

MAT-7938US

RESPONSE TO FINAL REJECTION <u>UNDER 37 C.F.R. § 1.116</u> Expedited Procedure

Mail Stop AF Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Sir:

Responsive to the Final Rejection dated December 16, 2003, reconsideration is respectfully requested in view of the remarks set forth below.

Claims 51-54 and 56-58 have been rejected under 35 U.S.C. § 102(b) as being anticipated by Tani et al. (U.S. Patent 5,294,910). It is respectfully submitted, however, that these claims are patentable over Tani for the reasons set forth below.

Claim 51 recites a resistor element with a metal terminal at both ends of the resistor element. In the Amendment dated September 12, 2003, claim 51 was amended to include the feature of:

> ...an entire surface of said terminal is coated with a metal having a melting point of 500°C or below...

"Entire" includes the outside and the inside of the terminal. By contrast, in Tani, only the outside of the terminal is coated with tin and lead.

Appln. No. 09/509,928 Response Dated February 19, 2004 Reply to Office Action of December 16, 2003 MAT-7938US

For the rejection to be proper, the terminal of Tani would need to be coated with metal both on the outside <u>and</u> the inside. As the inside of Tani's terminal is not coated with metal, the rejection is improper and should be withdrawn.

Claim 56 is also patentable for the reasons set forth above.

Claims 75-77, 79-81, 84, 86-87, 89-90 and 92-93 have been rejected under 35 U.S.C. § 103(a) as being unpatentable over Tani. Claim 75 is patentable for the reasons set forth above with regard to claim 51. The remaining claims are patentable by virtue of their dependency on allowable claim 75.

Claims 54, 59 and 85 have been rejected under 35 U.S.C. § 103(a) as being unpatentable over Tani in view of Smith. Claim 55 has been rejected under 35 U.S.C. § 103(a) as being unpatentable over Tani in view of Kimura. These claims, however, include all the features of the respective independent claims from which they depend. Thus, these claims are also patentable for the reasons set forth above.

In view of the arguments set forth above, the above-identified application is in condition for allowance which action is respectfully requested.

Respectfully submitted,

RatnerPrestra

Lawrence E. Ashery, Reg. No. 34,
